Hannay Reels Guidemaster® GMX Update

▶ The Guidemaster® helps unwind and rewind hose faster, easier, and with less damage to the hose.

Features Include:

- Main body constructed of Grade 303 SST with black powder coat finish.
- Highly durable one-piece weldment with bearings on the top and bottom of the yoke with dust caps to limit dust and dirt intrusion.
- Five positive locking positions let the operator pull the hose out and away from sharp corners of cabinet or deck.
- A cover and push lever now comes standard on the Hannay GM-X Guidemaster® EPS-1 switch. This new cover provides superior protection against the harsh elements and an ergonomic push lever for easier activation to rewind hose and guide the hose on the reel in neat, uniform coils.
- Hourglass rollers made of wear-resistant ZAMAK material, adding extra material to bottom flanges for longer life.
