New Versatile Motor, the SX-800 - Now Available!

▶ Hannay Reels announces a new versatile motor - the SX-800. This new motor is a replacement motor for three popular existing motor models.

Features and Benefits:

- A universal base mount plate is provided making it the ideal replacement motor for three current motor models - the SX-103, SX-139 and the SX-153. See reverse side for more information.
- A shaft seal has been added for extra protection against water ingress.
- Now possible to easily change motor leads orientation out in the field as desired.

Base plate mounting instructions on reverse side.

ORDERING INFORMATION:

Please contact Hannay Reels Inside Sales Department at: 877-467-3357 or email reels@hannay.com for more information on specifications and stock availability on this new motor.

Universal Base Mounting Plate on the new SX-800 motor

▶ A key feature of the new SX-800 motor is its universal mounting plate with pre-drilled holes, allowing one motor to replace three different current models. The motor plate on the SX-800 can be easily moved and mounted according to where the motor leads need to end up on the reel.

◀ Hannay motor model SX-103 currently has motor leads located at 3 o'clock.

The new SX-800 motor mounting plate would be installed as shown. ▶

◀ Hannay motor model SX-139 currently has motor leads located at 9 o'clock.

The new SX-800 motor mounting plate would be installed as shown. ▶

◀ Hannay motor model SX-153 currently has motor leads located at 12 o'clock.

The new SX-800 motor mounting plate would be installed as shown. ▶
