Hannay Reels Brings Wide Range of Products to Utility Expo 2023

Westerlo, N.Y. – Products from Hannay Reels will be on display at The Utility Expo in Louisville, K.Y. from September 26 – 28. Located in booth N962, reel experts from Hannay will be on-hand to answer questions about the most durable hose and cable reels within the utility industry.

Hannay will bring four of their most popular reels which support utility grounding cables, transformer maintenance, and emergency high-voltage cable storage. Used in a variety of applications, Hannay's reels for the utility industry can handle static and utility grounding, arc or gas welding, washdown, pressure wash, lube, grease and more.

Hannay Reels products stand up to harsh weather and everyday use. They feature components that support a safe work environment, quick response time, and easy maintenance. Each reel is built to customer specifications with a variety of mounting options for truck, trailer, garage, and handheld applications.

To preview the Hannay Reels lineup at the 2023 Utility Expo, visit <https://www.hannay.com/en-US/news/article/utility-expo-2023/?t=Tradeshows%20and%20Events>.

You can view the following products in-person at the expo:

N400 Reel

This product can handle twin 1/4" through 3/8" oxy/gas welding hose. A spring rewind motor, non-sparking ratchet assembly and declutching arbor prevent damage from reverse winding. This reel has a narrow frame and compact mounting base, with optional roller positions to fit almost anywhere.

N700 Reel

This spring rewind reel is ideal for lubrication, water, air tools, high pressure, assembly operations and general industrial applications. It handles 1/4" through 1/2" single ID hose. The N700 comes with standard pressures to 3,000 psi and is customizable up to 10,000 psi. A declutching arbor prevents damage from reverse winding, extending the life of the hose.

1500 Reel

Manufactured with your choice of a manual or power rewind, the 1500 is ideal for pressure washing, air supply, water and more. This lightweight, compact reel is designed for long lengths of 1/4" through 5/8" ID hose. It operates with standard pressure to 3,000 psi with availability up to 10,000 psi.

SGCR

This spring rewind grounding reel is independently tested to 43 kA for 30 cycles and helps meet OSHA requirements for vehicle grounding. The automatic rewind features a ratchet mechanism that locks the reel. A built-in cable hoop and internal rotary device comes with each standard configuration.

About Hannay Reels

Hannay Reels is the leading manufacturer of durable hose and cable reels for both OEM and aftermarket applications, offering thousands of standard models, along with a wide range of custom-design capabilities. Hannay's superior manufacturing techniques, consistent quality, outstanding service, and unmatched value result in the most dependable, best-engineered reels in the business. This formula has solidified Hannay's reputation for helping companies around the world improve the productivity, efficiency, and safety of their operations since 1933. Hannay's industry-specific expertise comes from decades of experience with a variety of markets, including audio/visual, aviation, firefighting, industrial, processing, and transportation.
